Contract Number :- RDA/Sab/Keg/Ruwan/GSP/CECB/08

g) 1.1.8 The Employer :- *Director General , Road Development Authority, 1st Floor, "Maganeguma Mahamedura", 216, Denzil Kobbekaduwa Mawatha, Battaramulla. Telephone: 0112862795, Fax: 0112872272*

1.1.10 The Engineer for the Contract : Central Engineering Consultancy Bureau (CECB)

Engineer's Representative: Will be notified later

1.1.12 The Start Date shall be **14** calendar days from the receipt of the Letter of Acceptance.

1.1.14 Intended Completion Date 150 calendar days from start dates

1.1.19 Site is located at Deraniyagala electorate, Kegalle.

1.1.21 Construction of Bridge for Pahala Miyanawita to Beligaswaththa

4.2 Schedule of Key Personnel: (Directly involved in the project)

Minimum persons with qualifications and experience to be defined,

- | | |
|----------------------------|--|
| a. Technical | Project Manager with B.Sc Civil Eng. & 2 years working experience in similar Nature. |
| b. Contract Administration | Technical Supervisors with 4 years experience,
Quantity Surveyor with 3 years working experience other Contractors: Public Utility Agencies |

4.4 The Performance Security shall be 5% percent of the Initial Contract Price and shall be issued by a Bank acceptable to the Employer If one bidder will be selected as substantially responsive lowest evaluated bidder for both contracts, then the performance security will increase by another 3%(three percent, totally 8%) from the initial contract price for each contract

6.2 The Contractor shall submit a Programme for the Works within 14 Calendar days of the days from the date of Letter of Acceptance.

Contractor shall work only during normal working days unless otherwise agreed with the Engineer or in unusual circumstances where the safety of the public or work is in jeopardy. Holidays declared by the RDA shall be treated as non-working days.

6.4 The liquidated damages for the whole of the Works shall be **Rs.3650.00** per Day
The maximum amount of Liquidated Damages for the whole of the works shall be 10% (ten percent) of the Initial Contract Price.

8.1 The Defects Liability Period is **365** days

9.2 Engineer may order variations up to a total cumulative value of not exceeding the contingencies provided in the priced BOQ.

10.3 Replace the first sentence of Clause 10.3 “The Employer shall pay 56 date of each certificate” with the following.

“The Employer shall pay the Contractor the amounts certified by the Engineer within 54 days of the date of each certificate

10.5 The retention from each payment shall be 10% percent of the certified work done. The limit of retention shall be 5 % of the Initial Contract Price.

10.10 Price Adjustment

Price fluctuation is to be paid using simplified formula method of ICTAD under all civil works category.

10.12 Replace the Sub-clause 10.12 with the following: -

‘The Employer shall make advance payment to the Contractor in an amount equivalent to 20% of the Initial Contract Price less contingencies less Provisional Sums, Lump sum, Day works & within 14 Days after furnishing of an unconditional guarantee in a form and by a bank acceptable to the Employer or from the Construction Guarantee Fund. The guarantee shall remain effective until the advance payment has been repaid, but the amount of the guarantee shall be progressively reduced by the amounts repaid by the Contractor. Interest will not be charged on the advance payment.

Advance Payment would be made in two equal installments. The second Installment would be paid only after establishing that the first installment of the advance payment has been used exclusively for mobilization as per Cl. 10.12 and submission and approval of detailed construction programme. It should be make sure that Interest will not be paid for delaying of advance payments

13.1 The minimum insurance covers shall be:

- The minimum cover for insurance of the Works, Temporary Works and of Plant and Materials is 110% of the Initial Contract price.
- The minimum for insurance of other property is Rs. 1 Million per occurrence with the third party, number of occurrences unlimited.

The minimum cover for personal injury or death,

- For the Contractor’s workmen is Rs. 300,000/= per event
- Contractor’s employees other than workmen is Rs. 500,000/= per event
- For third party and employees of the Employer and other persons engaged by the Employer is Rs. 500,000/= per event

For all the above the number of occurrence shall unlimited.

The insurance cover shall be valid from the Start Date to the end of the Defects Liability Period.

14.2. Adjudicator

The Adjudicator proposed by the Employer is the Institution of Engineers Sri Lanka
Appointing Authority for the Adjudicator shall be the Institution of Engineers Sri Lanka
Name of the Adjudicator is the person appointed by the Institution of Engineers Sri Lanka

Hourly rate 2,500/- (All inclusive) & Reimbursable cost Rs. 1,000/

120 AS BUILT DRAWINGS

120.1 Description

The work shall consist of preparation of As Built Drawings necessary for performance of the completion of the work covered by the Contract, the Contractor shall supply them by the dates stated in the Contract Data.

The Contractor shall retain, at his sole expense, a qualified engineer for appropriate on site construction inspections to ensure that all improvements as set forth required, pursuant to RDA standards and specification, and as-built shall be provided. The contractor shall certify, in writing, to the Engineer that the improvements were done in compliance with the approved plan or agreement pursuant to RDA Standards & Specifications and as-built shall be provided.

Field managed record drawings should be provided to the Engineer with indicating additions and deletions for approval before preparation of the final as-built Drawings.

The following requirements shall be applied to each as-built drawing developed for the project and a hard copy together with an electronic AutoCAD drawing file format on CD shall submit for the Engineer.

120.2 Construction Requirement

The following items shall be required for all "As-Built Drawings.

- (a) All as-built for projects are required to be on 24" x 36" or similar size of construction drawings and shall bear the name and address, of the person who preparing the drawings and the date the as-built data is added to the original via the revision block. Electronic Auto CAD drawing files, based on the GPS coordinate, are also required (if the construction drawings are prepared based on GPS coordinates). Surveyor's/Engineer's statement (with embossed or wet seal and with an original signature on each sheet) shall verify that as-built drawings reflect the true conditions in the field.
- (b) Contractor's statement (with an original signature on each sheet) shall verify that all construction specifications and product qualities have been met or exceeded.
- (c) "AS BUILT DRAWINGS" of "RECORD DRAWING" shall be clearly labelled on each sheet.
- (d) If the details of under-ground service lines (Water, Sewerage, ducts &etc) are available needs to be included to the as-built drawings on the approval of Engineer
- (e) The location and elevation of the benchmark referenced will be shown on the drawing. If the reference benchmark is within the project, then a complete description of its location will be provided to assist in future locating.
- (f) Survey data, relative to the GPS coordinate grid, on right-of-way monuments installed or encountered within the project
- (g) Note any changes to the alignment either vertically or horizontally of curb & gutter sidewalk, pavers or any other surface improvement.

120.3 Measurement & Payments

No payment shall pay for the preparation of As built drawings. If the Contractor does not supply the As Built Drawings by the dates stated in the contract data, or they do not receive the Engineer's approval, the Engineer shall withhold the release of Final payment of the Contract.

SECTION – 6: SPECIFICATIONS

- **Standard Specification**
- **Particular Application**

GENERAL SPECIFICATION

The Standard Specifications comprise 'Standard Specifications for Construction and Maintenance of Roads and Bridges' prepared by Road Development Authority and printed in 1989 shall be used.

Bidders who are not in possession of this publication can purchase it from the CIDA.

The 'Standard Specifications for Construction and Maintenance of Roads and Bridges' issued under the authority of the General Manager of the Road Development Authority and published by the Institute of Construction Training and Development under publication number SCA/5. The cover page of this publication is illustrated here for reference.

PARTICULAR APPLICATION

This Particular Application should be read in conjunction with the Standard Specifications for Construction and Maintenance of Roads and Bridges, prepared by Road Development Authority and printed in 1989 or CIDA Publication No SCA/5 printed in 2008.

The Particular Application endeavor to deliver the requirements comprehensively and cover the full extent of the works referred to. Despite, the sections they apply shall be read in conjunction with the Standard Specifications for requirements of the similar products and works if not specified.

Where there is an ambiguity or discrepancy between the Particular Application and the Standard Specifications, the Particular Application shall prevail.

PRELIMINARIES & GENERAL

1.1 MOBILIZATION AND DEMOBILIZATION OF PLANT AND EQUIPMENT

The Contractor shall submit to the Engineer within 14 days from the date of Letter of Award his mobilization and demobilization plan for equipment, plant and machinery required for the Project. Plan shall include the location of plant, machinery and equipment and mode of transport. Engineer shall approve the mobilization and demobilization plan and payment shall be based on schedule of mobilization.

Payment

Payment shall be made according to the schedule submitted by bidder and within the lump sum amount agreed in the Bill of Quantities.

Item No	Description	Pay Unit
P-001	Allow for Mobilization and Demobilization of Contractor's facilities, plant and equipment	L.S.

1.4 ALLOW SUM FOR ENVIRONMENTAL MONITORING AND MITIGATION WORK.

The Contractor shall provide an access plan that outlines the proposed access route(s), types of equipment to be used for various phases and locations/sizes of lay-down areas in order to prevent/minimize disturbance to vegetation and soils if necessary. The Contractor shall provide details of the containment systems proposed for use in preventing any debris from entering the Cascade River during break-up and removal of the south abutment and during construction/installation of the bridge as per the instruction given by the Engineer. The Contractor shall provide an Emergency Response Plan that outlines procedures to follow in the case of a spill or other type of emergency when needed. The Contractor shall provide an dust and noise preventing plan in the site during the construction. All demolition, construction debris and other waste materials will be disposed of at an approved landfill facility outside the park. Vegetation removal will be minimized as much as possible, especially in riparian areas. No excavation or removal of material from the riverbed will be allowed. The site will be secured against erosion during any periods of construction inactivity or shutdown. If blasting is proposed in order to break up the south abutment, this must be done in accordance with the relevant DFO Measures to Avoid Harm to Fish and Fish Habitat. All other work for the bridge is to occur above the wetted stream and in a manner that minimizes disturbances to the banks of the watercourse. Machinery is to arrive on site in a clean condition and is to be maintained free of fluid leaks. Machinery is to be washed, refueled and serviced and fuel is to be stored at least 100 m away from the river to prevent any deleterious substance from entering the water. Equipment and materials lay down areas will use existing trails, roads and hard surfaces wherever possible to avoid disturbance to native vegetation, especially riparian vegetation.

Payment

Payment shall be made at the unit price as contained in the BOQ

Item No	Description	Pay Unit
P-002	Allow sum for Environmental monitoring and mitigation work	L.S.

1.11 DISMENTLE THE EXISTING MASSONARY STRUCTURES, CONCRETE STRUCTURES, STEEL STRUCTURES & CULVERT PIPES.

Measurement

Dismantle & removal of existing structures shall be measured as the Provisional sum for satisfactory dismantled and removed of existing structures.

Payment

Payment shall be made as Provisional sum. The price shall be full compensation for all materials and labor required to perform the work described.

Item No	Description	Pay Unit
P-003	Dismantle the existing masonry structures, concrete Structures, steel structures & culvert pipes	P.S.

1.12 ALLOW SUM FOR SURVEYING, INVESTIGATION & DESIGN (PREPARATION OF SHOP DRAWINGS)

SURVEYING

Establishment of TBMs and determination of its Horizontal coordinates (N, E) and Zenith (Z) value of the control points to be done by arbiter to site. TBM shall be established away from the proposed site but shall not too far to the site. Having established X, Y, Z coordinates of all control points the surveyor shall proceed with the detail surveying.

The surveyor shall have kept hand written survey notes for all the observations of detail survey. Detail survey shall have cover at least 50m length either side along the road or up to exiting road from proposed bridge location with corridor of 15m either sides and 25m length either side on waterway from the proposed bridge center. All points taken on features and structures should record their North and East coordinates and Elevations. For features and structures/buildings partly falling within the defined corridor, it must be fully surveyed to obtain closed geometries. The Contractor shall provide the relevant computerized drawing database in a good quality CD.

Initially contractor shall excavate up to foundation bottom level of the abutment, after that contractor should carried out soil investigation (Using mackintosh test or Manual SPT) with the approval of Engineer. If soil condition is not in satisfactory level, Engineer has to propose the suitable solution accordingly. After finalizing the dimension and other consideration of the bridge contractor shall finalize the preparation of the shop drawing and get the approval from Engineer.

Payment

Payment shall be made from the pay item in the Bill of Quantities.

Item No.	Description	Pay Unit
P-004	Allow sum for Surveying, Investigation & Design (Preparation of Shop Drawings)	P.S

1.13 ALLOW SUM FOR TREES PLANTAION & MAINTAINANCE

Planting trees should be selected according to the site’s typology, the hardness of the tree species, and the ability of the tree species to improve drainage, trap dust, and reduce surface runoff. Selection criteria are based on the medicinal, nutritional, economic and ecological value of the trees, as well as their adaptability, the cultural values associated with specific tree species, and their ability to absorb carbon dioxide. Different tree

planting designs can be applied depending on the availability of space. The general guidance for row plantings is to plant larger trees at 3 to 5 m apart between two trees. Single row planting only be used on where space is limited. The planting area has to be shallow and wide to suit the development of roots, because most of the roots grow within the upper 12 inches of the soil.

Planting holes should be dug 30 cm x 30 cm, 45 cm x 45 cm, or 60 cm x 60 cm (especially in dry areas) for planting trees. The dimensions of the hole will depend on the size of the seedling. The Contractor shall maintain the plants during the construction period & through the defect liability period.

Payment

Payment shall be made from the pay item in the Bill of Quantities.

Item No.	Description

ROADWAY EXCAVATION, HARD ROCK USING CHEMICAL

Location of control blasting will be limited to selected area bound within the Right of way (ROW), approved by the Engineer. After soil excavation, measurements or cross sections shall be taken to quantify the work done. Before the commencement of the work, the Engineer shall be notified via written request letter to identify the area where rock be blasted. Accordingly, the Engineer will inspect the area for releasing hold point before commencement of the work.

Rock will be drilled using handheld drilling machines which are pneumatically operated. Holes should be drilled no further than 15-30cm apart. Recommended hole diameter 38mm -50mm. Dril 80-90% of the depth depending on the type of rock/material to be removed. Use rubber gloves and safety glasses while mixing the materials.

Payment; Payment shall be made from the pay item in the Bill of Quantities.

Item No.	Description	Pay

4. A.8 SUPPLYING GEOTEXTILE FOR FOUNDATION BASE AS NECESSARY

Payment

Payment shall be made from the pay item in the Bill of Quantities.

Item No.	Description	Pay
Unit		
P-005A	Supply geo-textile for foundation base as necessary	Sq.m

A.9 SUPPLYING & COMPACTING ABC FOR FOUNDATION BASE AS NECESSARY

Payment; Payment shall be made from the pay item in the Bill of Quantities.

Item No.	Description	Pay
Unit		
P-006	Supply & compacting ABC for foundation base as necessary	Cu.m

4. A.10 BOULDER PACKING FOR FOUNDATION BASE AS NECESSARY

Payment

Payment shall be made from the pay item in the Bill of Quantities .

Item No.	Description	Pay
Unit		
P-007	Boulder packing for foundation base as necessary	Cu.m

5.1.1 FABRICATION OF STEEL SUPERSTRUCTURE, LOADING, TRANSPORT AND UNLOADING STEEL SUPERSTRUCTURE. ERECTION OF STEEL BRIDGE SUPERSTRUCTURE SPAN AS SPECIFIED IN THE DRAWING.

RDA issue the design & drawing. Contractor shall submit alternative design if given member sizes is not available. Weight of each member should be selected with 10% tolerance in weight. Contractor is not allowed to change the Configuration given in the drawing.

The Contractor shall prepare shop drawings for the fabrication of all members. All drawings should carry standard symbols as per BS 499. Complete information regarding location, type, size and extend of welds shall be clearly shown on the shop drawings.

Details of the procedure for fabrication and assembly shall be submitted by the Contractor with the fabrication program before commencement of fabrication. Structural steel shall conform to EN 10025 or equivalent standard. Bridge (including handrails) shall be hot dip galvanized in accordance to BS EN ISO 1461 or provided with equivalent painting according to EN ISO 12944-1. The bolted connections shall be designed as connections of friction type or shear type whichever is applicable. For main structural steel, pre-loaded HSFG bolts grade 10.9 shall be used, for secondary steel structures bolts of minimum grade 4.6 can be used. The Contractor shall, to the extent necessary carry out trial erection in his regular workshop.

The painting shall consist of the complete surface treatment including surface preparation and final protective coating of all structural steel parts. Clean surfaces shall be finished with two coats of water borne self-priming finished (acrylic type).

Contractor should arrange all vehicles and machineries for loading, transportation and unloading at the site location. All members except Main girders, transoms bracings and rails should be packed well and store in timber pallet boxes and shall ensure that during

transport there will be no distortion or damages to the steel work and its protective coating. Contractor is responsible for security and safeguard of all components after taking over of components during transport and store & erection at site

During erection, the parts shall be accurately assembled as shown in the approved drawings. The material shall be carefully handled so that no parts are bent, broken. All field rivets and bolts, the heads of such rivets and bolts, all welds and any surfaces from which the shop or first coat of paint has become worn off or has otherwise become defective, shall be cleaned and thoroughly covered in accordance with agreed repair procedures.

The Contractor shall undertake the Test in a planned and controlled manner to ensure that the quality requirements are achieved. The Contractor's Test Plan included in the QMS/CVS shall cover and Testing shall be in conformity with the British Standards Institution (BSI)

Payment

Payment shall be made from the pay item in the Bill of Quantities.

Item No	Description	Pay Unit
P-012	Steel: Fabrication, Loading, Transport, Unloading, Erection span as specified in the drawing.	P.S

SECTION – 7: BILL OF QUANTITIES

BILL OF QUANTITIES

PREAMBLE

1. The Bill of Quantities shall be read in conjunction with all other bidding documents.
2. General directions and descriptions of work or materials given elsewhere in the bidding Documents are not necessarily repeated in the Bills of Quantities. For the full meaning of each Item, reference should be made to the applicable passages in the bidding Documents.
3. The prices and rates entered by the Contractor in the Bill of Quantities shall be deemed to cover the complete and finished works in the final position as required by the bidding Documents, including, inter alia, all costs and expenses which may be required in and for the construction and maintenance of the works, together with all risks, liabilities, contingencies, insurance, sampling, testing, providing all necessary assistance to the Engineer and in general all obligations imposed or implied by the contract.
4. Without affecting the generality of the foregoing provisions the prices and rates entered by the contractor in the Bills of Quantities shall also include, inter alia, all costs and expenses involved with or arising from the following:
 - i The provision, storage, transport, handling, use, distribution and maintenance of all materials, plant, equipment, machinery and tools, including all costs, charges, dues demurrage or other outlays involved in carriage and importation.
 - ii The provision and maintenance of all staff and labour and their payment, accommodation, transport, fares and other requirements.
 - iii Setting out, including the location, construction and preservation of survey markers, measurement and supervision.
 - iv The provision, storage, transport, use, handling, distribution and maintenance of all consumable stores fuel, water and electricity including the requirements of the Engineer's Representative and his staff.
 - v The location, test proving, opening, operation, reinstatement of all quarries and borrow pits, as well as compensation and mining royalties costs associated with quarries and borrow pits or any other land the contractor may require additional to that provided free for the execution of the permanent works.
 - vi Sampling, the transport of samples, testing, the carrying out of trial sections of earthworks or payment and the checking of all information given by the Engineer.
 - vii Injury caused to the Works under Construction, Plant, Materials and consumable stores by weather.
 - viii Repairs to the Works either prior to or during the Period of maintenance.
 - ix Maintenance work as detailed in the Specifications and the Conditions of Contract and the maintenance of public amenities.
 - xi The supply of manufacturers test certificates.
 - xii The protection of mains and services, and cost of repairs in case of damage caused by the Contractor.
 - xiii Pumping and dewatering; the protection of excavation faces.
 - xiv The provision and maintenance of temporary diversions in order that through traffic flow shall remain unobstructed through the contract period and in general the provision of all temporary works required in connection with the works.
 - xv Insurance, custom duties, taxes(excluding VAT) levies, first aid, welfare and safety requirements and all other overheads and costs, protection of existing bridge in case of stage construction and profit.
5. A price or rate shall be entered against each Item in the Bills of Quantities whether quantities are stated or not. Item against which no price or rate is entered shall be deemed to be covered by the other prices or rates entered by the Contractor in the Bill of Quantities. The unit price or rate entered against any Item shall take Precedence over any miscalculation in the total sum against that Item. Where separate items have

not been provided in the Bill of Quantities for work shall be deemed to have been included in the other prices and rates.

6. The Quantities given in the Bill of Quantities are estimated only and are given to provide a basis for the tender. No guarantee is given for their accuracy and payments to Contractor will be based on the prices and rates quoted in the bills applied to measured quantities for work done.

The quantity for each Item of work executed by the Contractor in accordance with the Contract shall be measured net and no allowance will be made for waste, bulking, shrinkage decrease of volume due to compaction or the provision of working space.

7. The items in the Bills of Quantities are the general application to the whole of the works at any location on site or any part of the works as indicated in the bid documents or instructed by the Engineer's representative.
8. Tenders, which group several items together in the Bill of Quantities under one price, will not be accepted.
9. Items mentioned "Provisional" in the Bill of Quantities are not to be executed unless ordered by the Engineer. They may be expended wholly or in part or not at all as directed by the Engineer. Payments for Utility diversions will be made by the contractor to the CEB, SLT, NWS&DB or any other agency with the approval of the Engineer from the Provisional Sum in Item No 2.2. An Administrative charge of 10percent on the invoiced cost will be paid to the contractor. The contractor will obtain the estimated cost of the utility diversion from the respective utility agency and submit for the approval of the Engineer. The contractor will be responsible for the timely completion of the utility diversion. The client will assist the contractor in this regard.
10. Preliminary expenses which are not specifically mentioned in the document are expected to be included in the overhead component of the rates.
11. The Units of measurement described in the Bill of Quantities are Metric Units. Abbreviations in the Bill of Quantities are as follows: -

hrs	-	Hours
m	-	Linear Meter
m ² /Sq.m	-	Square Meter
m ³ /Cu.m	-	Cubic Meter
Nos.	-	Numbers
L.S	-	Lump Sum
Mth.	-	Month
lt	-	Liter
kg.	-	Kilogramme
MT	-	Matrice Tonne

DAYWORKS

1. The rates entered in the Schedule for Bill of Quantities shall form day works items for pricing extra work ordered to be done in accordance with the Contract.
2. The rates shall include all overheads and profit and all other costs of whatever nature necessary for and incidental to the performance of extra work whenever ordered and these rates required anywhere on the Site for the operation of plant the provision of labour or the provision of materials and shall be deemed to include inter alia:

Plant	Operation, maintenance, repairs, fuel, oils grease, hydraulic fluids, taxes, duties operator's wages and overtime, traveling time, transport supervision, administration costs related to the use of such plant.
Labour	Wages, overtime, bonuses, traveling time, hand tools, accommodation, fringe benefits, transport and supervision.
Materials	Provision, transport, handling, wastage and storage.

In the case of Plant and labour, only time spent working shall be paid for.

For Day works required outside the Site area (which for these purposes shall mean all areas shown on the plans for permanent works and all areas of temporary works such as Contractor's and Engineer's camps, quarry, borrow pits and their access roads, diversion roads etc.), the following should be chargeable :

Plant	:Self traveling : Actual travel time of and to place of stationing on the day of the work.
Transport :	Traveling time of the places of transport (lorry, low loader etc.)
Labour	:Travel time for the means of transport used.
Materials :	Traveling time for the means of transport used.

The rates shall apply only to such work, as the Engineer shall instruct in writing to be carried out as day works. All items should be priced.

FORM OF BID SECURITY

[this Guarantee form shall be filled in accordance with the instructions indicated in brackets]

.....
...*[insert issuing agency's name, and address of issuing branch or office]*

h) **Beneficiary:** Director General , Road Development Authority
1st Floor, "Maganeguma Mahamedura",
216, Denzil Kobbekaduwa Mawatha, Battaramulla.

Date:*[insert (by issuing agency) date]*

BID GUARANTEE No.:*[insert (by issuing agency) number]*

We have been informed that*insert (by issuing agency) name of the Bidder]* (hereinafter called "the Bidder") has submitted to you its bid dated *[insert (by issuing agency) date]* (Hereinafter called "the Bid") for the execution of **Construction of Bridge for Pahala Miyanawita to Beligaswaththa with Contract No: RDA/Sab/Keg/Ruwan/GSP/CECB/08**

Furthermore, we understand that, according to your conditions, Bids must be supported by a Bid Guarantee.

At the request of the Bidder, we*[insert name of issuing agency]* hereby irrevocably undertake to pay you any sum or sums not exceeding in total an amount of*[insert amount in figures]**[insert amount in words]* upon receipt by us of your first demand in writing accompanied by a written statement stating that Bidder is in breach of its obligation(s) under the bid conditions, because the Bidder:

- i. has withdrawn its Bid during the period of bid validity specified; or
- ii. does not accept the correction of errors in accordance with the Instruction to Bidders (hereinafter "the ITB") of the IFB or
- iii. having been notified of the acceptance of its Bid by the Employer during the period of bid validity,
 - (i) fails or refuses to execute the Contract Form, if required, or
 - (ii) fails or refuses to furnish the Performance Security, in accordance with the ITB.

This Guarantee shall expire:

- (a) if the Bidder is the successful bidder, upon our receipt of copies of the Contract signed by the Bidder and of the Performance Security issued to you by the Bidder; or
- (b) if the Bidder is not successful bidder, upon the earlier of the successful bidder furnishing the performance security, otherwise it will remain in force up to*(insert date)*

Consequently, any demand for payment under this Guarantee must be received by us at the office on or before that date.
