### HSR Summary – 2024

### **CONTENTS**

			<u>P</u>	AGI	<u>-</u>
01.	GENERAL NOTES	5	Ι	-	IX
02.	BASIC RATES		1	-	8
03.	SECTION – I	(TRANSPORT)	9	-	12
04.	SECTION – II	(ROADWAY/FOUNDATION/TRENCH EXCAVATION)	13	-	14
05.	SECTION – III	(AGGREGATE/RUBBLE PILING)	15	-	16
06.	SECTION - IV	(EARTH FILLING & COMPACTION)	17	-	18
07.	SECTION - V	(RUBBLE PITCHING/PAVING)			19
08.	SECTION - VI	(AGGREGATE SPREADING & ROLLING)	20	-	21
09.	SECTION - VII	(ROAD SURFACE TREATMENT)	22	-	26
10.	SECTION – VIII	(ROAD SURFACE TREATMENT) (ROAD MAINTENANCE)	27	-	28
11.	SECTION – IX	(ROAD SIDE DRAINAGE SYSTEM)	29	-	30
12.	SECTION – X	(CONCRETE & STRUCTURAL WORK)	31	-	42
13.	SECTION – XI	(ROAD FURNITURE ITEMS)			43
14.	SECTION – XII	(ROAD SIGNS)	44	-	45
15.	SECTION – XIII	(MISCELLANEOUS)	46	-	51
16.	SECTION – XIV	(SURVEYING & DAY WORKS)			52
17.	ANNEX – I	RATES FOR ASPHALT MIXES FROM PLANTS			
18.	ANNEX – II	SPECIFICATIONS RELATED TO HSR ITEMS			
19.	ANNEX – III	ANALYSIS FOR MACHINE EXCAVATION			
20.	ANNEX – IV	TABLE OF TRANSPORT COST PER CU.M/KM			
21.	ANNEX – V	(Ref. General Notes 23.2) RATES FOR TRANSPORT AND PAVING OF INTERLOCKING	G BLO	CK	S

\*\*\*

HSR-2024 insion Highways HSR-2024 insion Highways HIMERING Dit and Highways Kimistry of Transport and Highways

#### <u>ROAD DEVELOPMENT AUTHORITY – HSR ANALYSIS (METRIC)</u> <u>GENERAL NOTES</u>

- 1. This **Highway Schedule of Rates (HSR)** becomes operative from **01.01.2024.** HSR has given the maximum rates adoptable in the estimation of projects. In case, the resources are available at lesser rates depending on area and locality, the Engineer shall use such rates in the BOQ for the preparation of Estimates.
- 2. Basic prices of materials used to derive the rates in this schedule are considered **without the Value Added Tax** (VAT).
- **3.** The rates are not included with overheads and profits component. For the purpose of preparation of <u>Engineer's</u> <u>Estimates</u>, these basic rates should be added with 20% for road works and 20% for bridge works. Provisions should be made separately in the estimate for the payment of **VAT**.
- 4. Work has to be carried out as per (i) Standard Specifications for Construction & Maintenance of Roads and Bridges (S.S.C.M.), issued by the CIDA and (ii) Road Maintenance Manual issued by the RDA.
- **5.** The description of all items in the bills shall briefly conform to that in the relevant items appearing in this schedule so as to avoid any ambiguity. Control of works, control of material and measuring & paying shall be carried out as per S.S.C.M. 104 to 106.6. However, where provision for control of traffic and safety measures for the road users are not included under such items, rate shall be provided separately and paid under the relevant HSR B0-704/B0-705 or on approved S.S.R.R or on closely monitored work.
- 6. The basic labour rates given in this schedule are inclusive of 12% E.P.F., 3% E.T.F., and the special allowances ordered by the Government.
- 7. For works under Force Account, in <u>exceptional cases</u>, Sk'A" labour at higher rates than that given in this schedule may be engaged on <u>adhoc basis</u> with the DG/RDA's prior approval only.

X

- **8.** For items where cement and/or steel are used, the transport of same is included in the basic price. The rate of Emulsion per liter given in the HSR is exclusive of transport and shall be paid separately.
- **9.** All cement to be used for Concrete, Structural and Masonry/Rendering work shall be of approved quality and shall conform to the specifications required by the Road Development Authority.
- **10.** Materials from approved manufacturers only shall be used in all works (S.S.C.M. 1700). The borrow materials such as soil, aggregate and materials such as Bitumen binder etc. shall be subjected for quality assurance by sample checks during the construction as per S.S.C.M. 1602
- 11. S.S.RR. and day work items shall be approved by the Provincial Director, subject to the following conditions:
  - (a) Any S.S.R. where the amount of respective B.O.Q. item does not exceed Rs. 500,000/-, irrespective of whether the S.S.R. is based on HSR, or not.
  - (b) All the **S.S.RR** and day work items, which are based on HSR, irrespective of the amount of B.O.Q. item, or as per directives issued by the Director General/R.D.A. during the year.
- **12.** Concrete mixers should be used for mixing of all reinforced concrete or concrete specified by their Grade and in other concrete mixing exceeding 3 cu.m, unless otherwise directed. Weigh batch mixers shall be used for all concrete specified on Grade 25 and above.
- **13.** In respect of all works involving improvements to existing roads, contractor shall control traffic as per S.S.C.M. 103.

#### 14. <u>Hire Charges</u>

- 1. Hire charges given in this schedule are exclusive of overhead and profit component and taxes.
- 2. Actual work done in a day in machine hours (mhr) has to be paid. The minimum mhr/Day is 4 machine hours and if the actual work done is less than 4 mhr then the cost for 4 mhr is to be paid without the cost of fuel.
- 3. Plant hire charges not included in the HSR could be obtained from RDA schedule of hire charges for Machinery & Equipment given from Director/Mechanical. Otherwise procurement procedure as in General Notes Clause No. 18 should be followed.

4. Hire charges given in this schedule are provided by the Director/ Mechanical, RDA based on the fuel rates prevailed at the time of publication (Rs. 371.00 for Petrol and Rs. 363.00 for Diesel). These Hire charges should be adjusted with the price fluctuations of fuel by referring to the following formula.

#### Modified Hire Charge = $R [1 + (n - n_0)/r]$

Where,

- R = Hire charge issued in this HSR
- r = Rate of fuel usage in I/km or I/hr
- n = New price of fuel issued by the Ceylon Petroleum Corporation
- $n_0$  = Price of fuel considered for the hire charge as mentioned in this HSR
- **15.** In the case of building construction works, rates in BSR-2024 prices prepared by the State Organizations on building construction, shall be adopted.
- **16.** S.S.RR. approved with rates/prices applicable for a particular year, may be adopted for subsequent year/s where necessary, provided that only rates/prices are revised as applicable to the relevant year.

#### 17. <u>Materials available/recovered during execution of works</u>:

All suitable earth, rock, steel or precast material and components available or recovered from road way excavations or demolition works shall be utilized in construction work with the approval of the Engineer and surplus disposed as directed. In the case of bridge re-construction works all bridge components such as steel girders, deck plates, and reinforcements etc., which are dismantled, shall be recovered and repaired for re-use. These items should be taken to an inventory by the Engineer and kept in stock under good care for reuse. **Separate items shall be included in the Estimates for reuse of such materials at <u>recovery cost</u>.** 

#### 18. <u>Procurement</u>:

In cases where the resources have to be procured by tender procedure, the **Tender Committee shall take** decisions to make such awards according to the guide lines given in "Procurement Manual/Procurement Guide Lines 2006 – Goods & Works" and its subsequent amendments, issued by the National Procurement Agency, Sri Lanka.

- a. All tender committees to procure materials for RDA work on works orders shall have a member from RDA authorized by the relevant Director/Provincial Director, and prior concurrence of the relevant Director/Provincial Director shall be obtained for the prices so decided before executing the work.
- **b.** In case where Project Directors/ Provincial Directors procure materials at tender prices different to HSR or approve tender prices different to HSR fixed by other tender boards following government tender procedure as stated in above para, he shall take action to pay the contractor on prices approved by the tender board and amend / revise the relevant rates and the Estimates accordingly.

#### 19. Payments under provisional sums:

"Provisional sum" means a sum included in the bill of quantities for the construction management services, execution of work, supply of goods/materials/ services or contingencies where the work items cannot be quantified accurately. The provisional sum amounts shall be included in the BOQ, by the **Engineer/Provincial Director** as per relevant assumptions on the matter and should be reasonable and justifiable respect to the site conditions and design requirements. This shall be executed in whole or in part or not at all at the direction and discretion of the Resident Engineer/Chief Engineer/Provincial Director. In case the provisional sum provided is not sufficient, funds allocated for contingencies item in the estimate shall be utilized to cover additional cost subject to the approval of the Provincial Director.

All such works, supplies, services or sub-contracts carried out by order of **Resident Engineer/Chief Engineer/Provincial Director** shall be valued at the relevant rates in the approved B.O.Q. or HSR if available. if the B.O.Q. or HSR does not contain any rates, then suitable S.S.RR or day works shall be agreed upon between Resident Engineer/Chief Engineer/Provincial Director and the contractor shall carry out work according to such approved S.S.RR.

#### 20. Royalty/rental for materials mined:

Royalty/rental for approved borrow earth and aggregate materials mined from state land/private land shall be reimbursed **without overheads** to the contractor, on confirmation of the payment of royalty/rental by the Provincial Director of the relevant area where the mining is being executed. Royalty/rental rate shall not be more than the rate approved by the Government Agent/Divisional Secretary of the relevant area. In case the materials cannot be mined from state lands, government procurement procedure shall be followed as given in the General Notes **Clause No.18**.

- **21.** Prior to preparation of the BOQ, suitable borrow pits shall be identified at locations as close as possible for economical transport and to the required quality, by the Resident Engineer/Chief Engineer//Provincial Director and transport distance shall be included accordingly in the BOQ and Estimates.
- 22. a. For any price variations other than works carried out on works orders, use the ICTAD formula guidelines and indices. December 2023 shall be considered as the base month for computation of fluctuations. However for contracts/work below Rs 2.0 million, payment on price variations shall not be considered. Clause 22 b, applies for works carried out on work orders.
  - **b.** If there is a change of ex-factory/manufacture's or ware- house price of different brands of cements, considered in the build-up of **basic price of cement** in the HSR, Director/ Provincial Director shall amend the basic price of cement after verification and pay on approved SSR. Similar procedure to be followed in case of **price changes in reinforcement steel & Bitumen.**

### 23. <u>Transport</u>

- Note:
- **1.** The rates for "transport" include all modes of transport up to a maximum distance of the stipulated range.
- 2. The most economical mode of transport shall be always adopted. In transporting materials (soil, sand, aggregate and rubble), if the average output of the transport vehicles cannot be achieved due to unavoidable delays or any other reason justifiable and acceptable to the Chief Engineer/Provincial Director. The rate of payment for transport shall be made under any relevant item selected from codesT1-001 to T1-003b irrespective of the type of vehicles to be used. However in case the quantity involved is more than 200 cu.m. per kilometer run and in situations other than stipulated in para above, the rate of payment for transport shall be selected from item codes T1-006 or T1-007 or T1-007a in the schedule whichever is relevant, For transport of plant made Premix, rate shall be as per item T1-009.
- 3. Transport of aggregate, soil, Emulsion and Premix materials shall always be paid separately unless otherwise directed.
- **4.** Rate for rubble transport up to 3 km may be selected from item codes **T1-002** to **T1-003b** supported with justifiable reasons.

#### 24. <u>Excavation</u> (S.S.C.M. 301 - 303) Note:

#### 1. a. Manual rates:

The rates given in this schedule if not otherwise stated are intended for manual excavation.

#### b. Bulk rate:

In the case of borrow earth supply where the estimated quantity <u>exceeds 200 cu. m</u> (for the whole project), the rates given under **B0-201**, **B0-202** or item codes **EW1-013 & EW1-014** shall be adopted. Similarly for Roadway **Excavations with quantities** <u>more than 200 cu.m.</u>, rates given under item codes **E1-027**, **E1-028 and E1-029** shall be adopted. When deviation from above rates is necessary, payment shall be made on approved S.S.RR. Based on actual site records (machine hours) or on work-studies carried out under close supervision by the Engineer, after obtaining approval of the Technical Committee.

- **2.** The rates include for excavation and loading or depositing up to 25 meters. Transport of excavated material more than 25 meters shall always be paid separately unless otherwise directed. In case of foundation excavation for structures, backfilling and compaction to be considered separately unless otherwise specified.
- **3.** Foundation excavation shall be paid at the modified rate applicable to the item to cover up the additional excavation to maintain required slope and working space.

#### Modification factor for rates applicable to the item = 1+iH/L+iH/W

- Where, i = 0.1 for hard clay soil or similar soil, can be cut nearly vertical walls
  - i = 0.2 for sandy clay (SC)soil or similar soil, can be cut walls with a slope of about  $15^{\circ}$
  - H = Excavation depth of the foundation according to the approved drawing

- W = Width of the excavation according to the approved drawing
- L = Length of the excavation according to the approved drawing

Cost for additional excavations for shoring shall be considered separately.

- 4. Soils are generally classified as in the Standard Specifications. (S.S.C.M. 301.2)
- 5. Construction of cofferdams that are necessary shall be paid separately. (S.S.C.M. 302(6)). Rates under items ST1-018, ST1-019 & ST1-020 are not applicable for bridge construction work. For bridge works, it shall be payable on S.S.RR based on closely monitored work-studies or on day works at HSR/machine hours, depending on the site conditions.
- 6. De-watering necessary for cofferdams shall be paid separately. (S.S.C.M. 302(6)).
- 7. Rates under items E1-011 to E1-019 are not applicable for the excavation for foundations of bridge structures. Payment for such excavations shall be made on approved S.S.RR based on closely monitored work-studies or on day works at HSR/machine hours, depending on the site conditions.
- **8.** Trench excavation for utility services and reinstatement shall be according to S.S.C.M. 305 and shall be read in conjunction with the procedures to be followed by agencies when trenching highways. Under no circumstances pedestrians and traffic using the road shall be allowed to suffer or inconvenienced due to trenching work, adequate notice have to be given to the public and necessary safety precautions have to be taken in advance.

#### 25. <u>Aggregate/rubble</u> (including loading & piling) Note:

- 1. Except where otherwise stated, the rates include preparing depots, loading and piling.
- **2.** The rates for items B0-302 to B0-313 include the cost of blasting materials.
- **3.** In exceptional cases such as limestone, "dug out" aggregate, special rates for items B0-302 to B0-313 shall be approved by the Provincial Director.
- **4.** Transport of aggregate and rubble not included in the rates shall be paid separately.
- **5.** Blasting operations shall be carried out as recommended in S.S.C.M. 306 and all works in blasting operations shall conform to the guidelines given in the National Environmental Act No. 47 of 1980 and any subsequent amendments.
- 6. Prior approval shall be obtained from the Provincial Director for the use of 19 mm hand broken aggregate.

#### 26. <u>Earth filling & compaction</u> (S.S.C.M. 304, 400 & 600) Note:

- 1. Approved soil that is piled shall be spread, watered and well compacted by rolling as per Standard Specifications.
- 2. The rates for earth compaction include the cost of watering.
- **3.** In the case of force account works, where the royalty or similar payments has to be paid for gravel, earth, clay, turf, etc., a claim shall be prepared separately for approval of the Provincial Director, subject to the conditions given under the **Clause 20 of the General Notes.** In case of works awarded on tender rates, the royalty is deemed to be included into the rates.
- **4.** Rates given for the items EW1-003, EW1-004, EW1-005, EW1-006, EW1-007, EW1-008 and EW1-009 on loose volume are for the work where the % density is not specified. If the rates are to be decided on compacted volume basis, the rate for loose volume shall be adjusted by multiplying the specified factor corresponding to the required % density by the factor given in table below.

% Density	Factor
1. For standard density not less than 95 %	1.35
2. For standard density not less than 100 %	1.42

For rates on other densities, S.S.RR. should be approved by the Provincial Director.

- 5. Transport of water beyond 25 Meters shall be paid separately.
- **6.** (i) The normal output of earth compaction per day will be 66 Cubic Meters using 8-10 ton Road Roller.
  - (ii) For earthworks in widening of existing roads where the average width is less than 1.5 meters, the output of earth compaction using 8-10 ton Roller shall be considered as 50 Cubic Meters per day.
- **7.** Use of small compaction equipment shall be allowed only if the space is restricted for operating 10-ton Road Rollers or equivalent.

#### 27. Rubble paving (rip rap protection - S.S.C.M. 804)

- **1.** P1-001 to P1-004 does not include the cost of rubble, which shall be paid for separately. The coverage rates of paving are as follows:
  - (i) For pitch paving 225 mm thick 0.26 cu.m. of rubble per square Meter.
  - (ii) For pitch paving 150 mm thick 0.17 cu.m. of rubble per square Meter.
  - (iii) For flat paving 225 mm thick 0.21 cu.m. rubble per square Meter.
  - (iv) For flat paving 150 mm thick 0.15 cu.m. rubble for square Meter.
- **2.** Rubble/rip rap paving shall be carried out to avoid damages by watercourses, slips, and slides to road embankments. Action shall be taken to include this item to routine/periodic maintenance flood damage items.

#### 28. Aggregate Compaction (S.S.C.M. 403 - 408)

**1.** The normal coverage areas shall be as follows:

- (i) For paved roads scarified for full width and for strip metaling 14.5 to 19.7 sq.m. shall be compacted with 1 cu.m. of new 50 mm aggregate.
- (ii) For construction of new bases and for edge correction 100 sq.m. shall be compacted with 8.5 10.0 cu.m. of new 50 mm aggregate spread in two layers to 100 mm loose thickness.
- **2.** Edge correction shall be 0.6 m (approx.) in width and edge strengthening shall be 1.2 m (approx.) in width, using 100, 50 & 19 mm aggregate conforming to S.S.C.M. 1103.
- **3.** <u>Strip metaling shall be considered only when the surface sections to be metaled are in narrow strips less than 1.2 m in width.</u>
- **4.** For construction of new bases, where aggregate compaction of the 19-mm and 50 mm is required 1.0 cu.m. of 19 mm aggregate is adequate for compacting with10 cu.m. of 50 mm.
- **5.** The normal quantities of aggregate that shall be compacted per day are as follows:
  - (i) For full width of paved road including scarifying and/or hand picking the surface will be, 12.75 cu.m. of new aggregate per day.
  - (ii) For construction of new bases, 23.5 cu.m. of new aggregate per day.
  - (iii) For strip or edge correction including loading scarifying and/or handpicking the surface, 9.90 cu.m per day.
- **6.** The average rate of travelling of Oil/Diesel Roller is 20 km per day.
- 7. The rates for items M1-001, M1-004 & M1-007 to M1-013 include the necessary re-transport of aggregate and no further re-transport costs shall be paid.
- **8.** The actual scarified area (which is not necessarily the Bitumen surfaced area) shall be paid for in items M1-002 & M1-003. Normally 0.3 m width (approx.) shall be reckoned as requiring scarifying for edge correction.
- **9.** Tempering and sharpening of scarifier tines are included in the rates for item M1-003 and shall not be paid for separately.

- **10.** The rates for aggregate compaction include the cost of watering.
- **11.** Transport of water beyond 25 Meters shall be paid separately.

#### **29.** <u>**Road surface treatment**</u> (S.S.C.M. 501 - 507)

- **1.** The various Grades of Bitumen generally used for road works shall be as stipulated in the standard specifications.
- **2.** The rates for Bitumen in surfacing include cost of Bitumen firewood/fuel and blinding materials. Transport of blinding materials exceeding 16 km shall be paid for separately. One cu.m.of blinding material is allowable for 125 sq.m. of Bitumen surfacing.
- **3.** The rates include the cost of internal transport of Bitumen up to 16 km from contractors yard.
- **4.** Approved sand shall be used for blinding.
- 5. The aggregate quantities and binder required per sqr. Meter of **D.B.S.T** or **S.B.S.T** work shall be as per the **tables 505-1 or 505-3 of the S.S.C.M.** depending on the method adopted. The application rates specified shall always be included in the description of the BOQ item for **D.B.S.T** or **S.B.S.T**.
- **6.** In case of force account works, the Officer in-Charge shall study the average consumption per sq.m. obtained by dividing the actual quantity of Bitumen used, in liters, by the area treated in sq.m. for first/subsequent coat Bitumen surfacing. The Engineer approving the item shall, after satisfying himself that the quantities claimed are reasonable and within the limits specified in the HSR, approve the quantities accounted for. If the quantities are outside the specified limits, the approval of the Provincial Director should be obtained.
- 7. Cost of Binder and cover aggregate for seal coat treatment work shall be paid separately only if specified.
- 8. The basic rates for the Asphalt Concrete items B0-361A, B0-362 and B0-362A have been worked out taking 60/70 Penetration grade bitumen as the binder. For item B0-365, it is worked out with Cut-Back of 60/70 penetration grade Bitumen and for item B0-366, it is Bitumen Emulsion CSS-1.% Binder content used for different types of Asphalt Concrete is based on generally accepted mix designs specific to the plant location recommended by the R&D division of the RDA.

Different Bitumen penetration grades and or different binder contents may be specified for the asphalt concrete mixes for special cases. Then approved binder Type and the content as a % shall be included in the description of the item in such variations.

9. (i) Densities of Asphalt Premix in compacted state for general estimation purposes shall be as follows.

### a. Wearing Course 2.450 m.t. per cu.m.

b. Binder Course 2.430 m.t. per cu.m.

For actual payments, design densities shall be adopted.

- (ii) Average density of Asphalt Premix in loose state shall be assumed as 1.48 m.ton per cu.m.
- **10.** The quantity of aggregate necessary for the production of 1 metric ton of Asphalt Premix (average for all six types considered in the HSR) by plant shall be taken as **0.6270 cubic meters.**
- **11.** The transport of aggregate for the production of Premix shall be paid separately and shall be decided according to the location of the mixing plant.
- **12.** The transport of Emulsion CSS-1 for the production of cold mix by plant shall be added to the rate per metric ton and shall be decided according to the location of the mixing plant. 59.17 liters of Emulsion CSS-1 are required for each metric ton of cold mix.

#### 30. Road surface maintenance (S.S.C.M. 1100 - 1102)

**1.** Where method of patching per half a kilometer is adopted, the quantity of Bitumen per half a kilometer per month approved in the routine Maintenance Estimates, may be increased or decreased when necessary. But the rate payable to the contractor for the monthly maintenance of the road surface per half kilometer shall be the rate approved for that half kilometer by the Chief Engineer at the commencement of the Financial Year. The actual rate payable for patching with Bitumen will be according to the appropriate items.

- **2.** All roads/sections of roads in the district for which 14, 21, 28, etc. liters per half kilometer per month have been approved shall be listed under groups 1,2, 3, etc., respectively in a schedule of roads, which will be approved by Chief Engineer, and shall become an attachment of the HSR after **Section xiv**.
- **3.** If during the course of the year, there is considerable variation between the estimated quantity of Bitumen per half a kilometer per month and quantity actually used in respect of any road or section of road, the Executive Engineer will examine the reasons therefore and seek the Chief Engineer's approval to amend the rate payable for Bitumen patching of that road or section of road during the same and/or subsequent Financial Year and amend the schedule referred to in **General Note 30 Item 2.**, above.
- **4.** The <u>prior</u> approval of the Chief Engineer should be obtained for extensive patching. Where extensive patching is carried out, no payment should be made for normal patching on the same half kilometer in the same month.

#### **31.** <u>Patch sealing</u> :(S.S.C.M. 1104)

Where the road surface shows signs of deficiency of Bitumen and pitted with numerous potholes, patch sealing shall be adopted.

#### 32. Road side and drainage systems (S.S.C.M. 701 - 707, 1302)

- 1. The rates exclude the cost of loading, unloading and transporting but include spreading suitably in the vicinity unless otherwise directed.
- 2. Culvert inlets and outlets should be cleaned before and after the rains.
- **3.** For cleaning choked culverts (item DR1-012) with head room/diameter less than 1 meter, day works rates shall be adopted.
- **4.** Drains should be cleared before commencing any types of surfacing (S.S.C.M. 501 507).

#### 33. Bridges, culverts, retaining walls, etc. (S.S.C.M. 1001 - 1010)

#### Note: 1. <u>Concrete work</u>

- i. The cost of shuttering is not included in the rates, and shall be paid separately.
- ii. The cost of hire charge for concrete mixer is included in the rates for concrete 'using mixers'.
- iii. Construction of necessary cofferdams, shoring, forming islands and de-watering shall be paid separately.
- iv. For all concrete with 19mm aggregate, crusher plant materials shall be used unless otherwise directed.
- 2. Only sand of approved quality shall be used for cement mixes, mortars & concretes.
- **3.** The rates include the cost of transport up to 25 meters on level ground in the relevant items. Any vertical transport required in excess of first 1.5 meters upwards or down wards shall be separately considered.
- **4.** Transport of water beyond 25 meters shall be paid separately.
- 5. Extra payment for scaffolding/staging where necessary is allowable if not included in the rate.
- **6.** To obtain the nominal mix of cement concrete 1:2:4 (19mm); batching of materials in the field under average conditions will be in the proportions 1:2 <sup>1</sup>/<sub>2</sub>:4 by volume. Cement concrete 1:3:6 (37.5 mm) and cement concrete 1:4:8 (50mm) may continue to be ba m mm , nm,m, m, tched by volume in the specified nominal proportions; cement should be by bags of 50 kg. and bags shall deem to be 0.035 cu. m. in volume.
- 7. The quantities of the various materials for cement concrete and cement mortars required to yield an average workable mix shall be as follows.

Description	Proportion [nominal mix] or Grade	Yield Unit	Cement in 50 kg	Sand (cu.m)	Aggregate /rubble (cu.m)
1. Cement concrete	g 40(19 mm)	cu.m	9.87*	0.6*	0.91*
2. Cement concrete	g 30(19 mm)	cu.m	8.17*	0.6*	0.90*
3. Cement concrete	g 25(19 mm)	cu.m	6.35*	0.6*	0.90*
4. Cement concrete	g 25(37.5mm+19mm) 70% 30%	cu.m	5.86*	0.6*	37.5=0.54* 19.0=0.24*
5. Cement concrete	g 20(19 mm)	cu.m	6.04*	0.53*	0.79*
6. Cement concrete	1:1 <sup>1</sup> / <sub>2</sub> :3(19 mm)	cu.m	8.12	0.60	0.91
7. Cement concrete	1:2:4 (19 mm)	cu.m	5.65	0.60	0.90
8. Cement concrete	1 <b>:2:</b> 4 (37.5 mm)	cu.m	5.65	0.60	1.00
9. Cement concrete	1:3:6 (19 mm)	cu.m	4.38	0.60	0.91
10. Cement concrete	1 <b>:</b> 3 <b>:</b> 6(37.5 mm)	cu.m	4.38	0.60	1.00
11. Cement concrete	1 <b>:</b> 4 <b>:</b> 8(50 mm)	cu.m	3.18	0.60	1.00
12. 12.5mm Cement render	1:2 mix	sq.m	0.15#	0.013	-
13. 19.0mm Cement render	1:2 mix	sq.m	0.23#	0.020	-
14. 12.5mm Cement render	1:3 mix	sq.m	0.12#	0.016	-
15. 19.0mm Cement render	1:3 mix	sq.m	0.19#	0.024	-
16. Random Rubble masonry in cement/sand mortar	1:6 mix	cu.m	1.77	0.40	1.10

- # In items 12 15 the cement quantity is exclusive of that required for smoothening where necessary.
- \* The above mix proportions for Grade concrete are given for estimation purposes. The actual proportions for Grade concrete shall be decided by mix designs at site and the rates shall be adjusted with the approval of the Provincial Director.

#### 8. Ready mixed concrete:

Ready mix concrete shall be used only on the written approval of the Director/Provincial Director and for the procurement of the material government tender procedure as given under **General Notes Clause No. 18** to be followed. The contractor for ready mix concrete shall be a copious supplier having minimum of one year experience of supplying ready mix concrete to projects acceptable to the tender board and shall have sufficient transport & pumping facilities, laboratory facilities for quality control and a qualified staff.

**9.** Wedge stones shall mean stones that are wedged and squared on one face and roughly dressed on the other five faces to enable them to be laid in courses.

### 10. Wearing surface for R.C.C/P.C.C decking (S.S.C.M. 1403)

Generally for 74.5 sq.m.of **50 mm. thick compacted wearing surface**, the quantities of material required will be 3.5 cu.m. 19 mm to 3.2 mm. Graded aggregate, 2.3 cu.m. sand and 381 liters Bitumen and 91 liters of kerosene. If Emulsion is used, the quantity of material required is 500 liters of Emulsion and 273 liters of water.

#### 11. Concrete pipe culverts (S.S.C.M. 1403)

- i. The diameter of pipes indicated refers to the internal diameter.
- **ii.** The rates include the cost of pipe, collars, rolling up to a distance of 25 m & lowering to bed up to 1.8 Meter depth, aligning and fixing.

**iii.** Excavation and backfilling of trench is not included in the rates unless otherwise mentioned.

#### 34. Labour, plant and materials

- 1. All labour, plant, equipment and materials have to be provided by the contractor.
- 2. The Engineer should maintain performance records of all types of machinery for future reference.

#### 35. Day works

- 1. Day works shall be defined and adopted by the Engineer under exceptional circumstances.
- 2. Labour rates fixed under section xiv of the HSR (Surveying, Leveling and Day works) shall be used in pricing day works. In cases of very special labour, such as skin divers etc., procument of same shall be as per General Notes clause 18.
- 3. Rate for materials in day works shall be the **purchase price subject to the condition that procurement** of same is done as per General Notes Clause No.18.
- 4. It is necessary that appropriate plant is used and works are programmed to minimize the costs to the satisfaction of the Engineer.

#### 36. Maintenance of road signs and markings: (S.S.C.M. 1501-1502)

All traffic signs, kerbs , parapets, guardrails, barricading and k.m. posts should be painted at least once a year unless otherwise directed by the Engineer.

#### **37.** <u>**Quality control work**</u>: (S.S.C.M. 1600)

- a. The Engineer is responsible for carrying out tests on all works before recommending for payments and maintenance of records. In case of dispute, it may be referred to Provincial Director. /Director (R & D) for a final decision. (S.S.C.M. 1602)
- b. Special attention should be made to control the alignment, thickness and surface regularities of pavement layers as per section 1601 of the S.S.C.M. using geodetic levels, camber boards and 3-Meter straight edges.

#### 38. Piece rates and allowances:

The amounts allowed for the items under "piece rates and allowances" are the anticipated basic costs to cover the expenses to be incurred, during the execution of the work.

#### 39. Labour Inputs

The labour inputs shown against the work items in this schedule do not include the Plant and Equipment Operator costs which are deemed to have been covered under the hire charges of the Plant and Equipment.

### 40. HSR Analysis is for internal use only. It cannot be produced in Court of Law as reference/authority and thus is a privilege document.

	======================================				
* NOTE	RATES FOR BORROW EARTH SUPPLY GIVEN UNDER ITEM CODES EW1-001 & EW1-011 IN THIS SHEDULE IS BASED ON MANUAL EXCAVATION AND INTENDED FOR SMALL WORKS INVOLVING LESS THAN 200 CU.M. IN THE CASE OF BORROW EARTH SUPPLY EXEEDS 200 CU.M(FOR THE WHOLE PROJECT), RATES BASED ON MACHINE EXCAVATION AS PER B0-201, B0-202, EW1-013 OR EW1-014 SHALL BE ADOPTED. FOR ANY DEVIATIONS THE PROCURAMENT PROCEDURE GIVEN IN "GENERAL NOTES", SHALL BE FOLLOWED.				
EW1-001	APPROVED SOIL (TYPE I & II MATERIALS)				
	EXCAVATION FOR SUB BASES & SHOULDER CONSTRUCTION INCLUDING LOADING AND PILING (LOOSE VOLUME) [SSCM 601.1 TO 601.4] :	CU.M	2,759.80	2,645.94	113.86
EW1-002	SPREADING PILED GARVEL (LOOSE VOLUME):	CU.M	323.95	286.98	36.97
EW1-003 *	* APPROVED SOIL SPREAD & ROLLED INCLUDING HIRE CHARGES, FUEL & WATERING (LOOSE VOLUME) [SSCM 601.1 TO 4] :	CU.M	645.85	286.98	358.87
ĸ	* SEE GENERAL NOTES SECTION 26.4 FOR RATE ON COMPACTED VOLUME.	HUN2			
* NOTE :	THE ITEMS EW1-003 OR EW1-004 ON MANUAL SPREADING SHOULD BE ADOPTED ON APPROVAL BY PD / CE FOR SMALL WORKS ONLY. WHEN MACHINERY IS USED FOR SPREADING AND COMPACTION, EW1-003A SHALL BE ADOPTED.	0			
	APPROVED SOIL SPREAD & ROLLED USING MACHINERY INCLUDING MOTOR GRADER & ROLLER HIRE CHARGES, FUEL & WATERING (LOOSE VOLUME) [SSCM 601.1 TO 4] :	CU.M	266.15	0.00	266.15
	RATE ON COMPACTED VOLUME.				
EW1-004	APPROVED SOIL SPREAD & ROLLED IN STRIPS WHERE AVERAGE WIDTH IS LESS THAN 1.2 METERS FOR ROAD WIDENING, INCLUDING HIRE CHARGES, FUEL & WATERING (LOOSE VOLUME) [SSCM 601.1 TO 4] :	CU.M	766.55	286.98	479.57
*	SEE GENERAL NOTES SECTION 26.4 FOR RATE ON COMPACTED VOLUME.				
EW1-005	DELETED				
EW1-006	APPROVED SOIL SPREAD AND COMPACTED IN PLACES BEHIND ABUTMENTS AND STRUCTURES, SHOULDERS ABOVE SUB BASE LEVEL AND IN SERVICE LINE TRENCHES USING 1/2 - 1 TON VIBRATING ROLLER INCLUDING WATERING. (LOOSE VOLUME) :	CU.M	765.35	371.43	393.92

## Transport and Paving of Interlocking Blocks-2024

1. Transport of Interlocking Concrete Paving Block per km transport (short distance - within the province)

Transport cost (Rs.)

.=	0.26	per Block/ km

 Paving of Interlocking Concrete Blocks. inclusive 50 mm sand bedding and compaction. Supply and transport of Blocks and bedding material to be paid separately. ( Depending on the design, Construction of side kerbs and ABC layer and sub grade preparation to be paid separately.)

Total cost of paving of interlocking blocks excluding the cost of side kerbs (Rs.)	.=	351.75	per Sq.m
